ABOUTSKIN DERMATOLOGY AND DERMSURGERY, PC

5340 South Quebec Street, Suite 300-South • 303-756-7546 (SKIN) • www.aboutskinderm.com

Greenwood Village is excited to announce that AboutSkin Dermatology has chosen to open a location near the Landmark Shops. AboutSkin is one of the most highly regarded dermatology and aesthetic practices in the country. This state-of-the-art gorgeous 10,400 square foot high-end space includes three patient waiting rooms, an in-office store for sophisticated skin-care and sunscreen, and boasts mountain views in 15 of the 18 exam/procedure rooms — allowing for a calm, peaceful, and serene environment.

This effort is spearheaded by Dr. Joel Cohen who founded this extraordinary practice in 2004. Dr. Cohen is an internationally recognized aesthetic dermatologist and skin cancer surgeon, who has taught all over the world. He has authored over 180 scientific publications as well as three academic textbooks on aesthetic treatments and skin cancer surgery. Dr. Cohen has also been quoted in many national newspapers and magazines (including *The New York Times*, *Glamour*, *Vogue* and *Shape*), and has been voted by his peers as a *Denver 5280 Magazine* “Top Doc” nine times. Throughout this time, Dr. Cohen (Brandeis University/ University of Michigan) has assembled a dermatologic dream team which includes Dr. Michael Contreras (USC), Dr. Samantha Stoler (University of Michigan), and Dr. Stephen Ho (UCLA), and PA Allen Markovic (Ohio State University) — where their ultimate goal is to take great care of your skin by offering comprehensive skin examinations, as well as the most advanced treatments for skin conditions with the most up-to-date technology.

Dr. Cohen holds academic appointments at two different universities; as an Associate Clinical Professor in the Department of Dermatology at the University of Colorado,

and as an Assistant Professor at the University of California at Irvine. Through teaching courses both nationally and internationally, Dr. Cohen is able to see what devices and procedures have the best data and the best results. He is also an editor and reviewer for 11 scientific dermatology and plastic surgery journals — which also helps him key-in on the most effective and innovative modalities. With this type of early exposure to innovations and data-driven procedures, Dr. Cohen and his team have been able to create a cutting-edge in-house research facility at AboutSkin — where they have already conducted over 50 clinical trials for different phases of the FDA process. In addition to advancing the collective knowledge in the areas of aesthetic surgery, cosmetic dermatology, and medical dermatology, the research has greatly enhanced the care of patients in our own community. AboutSkin has been taking the lead in many procedures such as the new DIMPLE cellulite treatment modality, CellFina which is just now being launched nationally — but has been performed on-site at AboutSkin as part of a 12-site FDA registry study since November 2014. AboutSkin is able to infuse the latest technology, techniques, and scientific data into their everyday practice — so that each and every patient can receive the most advanced individualized care for their skin concerns.

AboutSkin can be separated into four primary categories of service which include Medical, Surgical, Aesthetic, and Clinical Research. The Medical Dermatology team can treat a wide variety of skin diseases using an evidence-based approach to develop a tailored treatment plan for each patient. The Surgical Dermatology team includes the specialty of Mohs

skin cancer surgery. Both Dr. Cohen and their newest physician Dr. Daniel Jensen (Brigham Young University) have completed full-fellowship training with the American College of Mohs Surgery. Mohs surgery is a precise surgical technique used to treat skin cancer. During Mohs surgery, thin layers of cancer-containing skin are progressively removed and examined until only cancer-free tissue remains. With cure rates up to 99% for some skin cancers, Mohs is a highly effective tissue sparing procedure. Dr. Cohen co-authored a textbook about suturing skin cancer defects on the face, and has published extensively on utilizing his expertise in cosmetic laser procedures to minimize both surgical and traumatic scars. The Aesthetic Dermatology division incorporates the most advanced surgical and non-surgical cosmetic devices and technology. Standardized photography captured in two dedicated areas of the office

allows for scientific and objective analysis of aesthetic procedures. Aesthetic procedures include: Kybella, Botox, Dysport, laser hair removal, Restylane, JuveDerm, Voluma, laser skin resurfacing (CO2RE, HALO), CellFina, Ultherapy. Dr. Jensen is adding to the AboutSkin portfolio of procedures with the addition of innovative vein therapies directly from the Scripps Clinic for varicose veins and spider veins.

In short, AboutSkin is one of the most advanced and respected dermatology and aesthetic practices in the country. Their new Greenwood Village office offers a state-of-the-art, beautiful, and serene facility with great surface parking. The physicians integrate the latest technologies into medical, surgical and aesthetic treatments. All of this creates a unique, one-stop shop for maintaining optimal skin health even in the harsh climate of Colorado. The physicians of AboutSkin invite you to their practice. They are located at 5340 South Quebec Street, Suite 300-South. For additional information, call AboutSkin Dermatology and DermSurgery, PC directly at 303-756-7546 (SKIN) or visit their website at www.aboutskinderm.com. *GV*
